| | | take extra care in observing social distancing and should work from home where possible. If clinically vulnerable (but not clinically extremely vulnerable) individuals cannot work from home, they should be offered the safest available on-site roles, staying 2m away from others wherever possible. The individual may choose to take on a role that does not allow for this distance if they decide to do so. If they have to spend time within 2m of other people, settings MUST carefully assess and discuss with them whether this involves an acceptable level of risk. Identify staff who are clinically extremely vulnerable and clinically vulnerable. Line Managers to discuss medical needs disclosed by staff and support mechanisms implemented. Regular communication with staff working from home. Staff must not be disadvantaged by not being present on site. | | | | 19/people-at-higher-risk-from-coronavirus/whos-at-higher-risk-from-coronavirus/ If an employee deemed clinically vulnerable is unable to work from home or chooses to return to work, then a specific risk assessment MUST be completed by a suitably trained person. The SR12 blank risk assessment form can be used to facilitate this process. The requirement remains to complete a risk assessment for new and expectant mothers. The template SR14 new and expectant mothers at work checklist can be used to facilitate this process. Both the SR12 and SR14 risk assessment templates are available on the Nottinghamshire Schools Portal at: https://www.nottinghamshire.gov.uk/schoolsportal/health-and-safety/risk-assessment Any individual risk assessments for staff MUST be completed in conjunction with the employee and manager. Both parties MUST sign the risk assessment. Regular communication for both parties to discuss concerns and additional / reduced control measures. The risk assessment MUST be reviewed by both the employee and manager regularly and updated to reflect any changes to arrangements. | | | | | | |

| | | classrooms / other learning environments. Use of hand gel and accessibility to children is risk assessed within a COSHH assessment and MSDS sheet is available. Specific consideration to ingestion and fire. Note: hand washing is more effective than the use of hand gel. Social distancing will be maintained wherever possible ensuring that staff and pupils are spaced apart at all times. | | | | wash their hands after every time they put something in the bin. All these measures are in place. Social distancing in school will include; Sitting children at desks that are 2m apart Ensuring everyone queues and eats further apart than normal Keeping apart when in the playground or doing any physical exercise Visiting the toilet one after the other Staggering break times Putting guidelines on the floor in corridors Avoiding unnecessary staff gatherings. Social distancing for very young children will be harder to maintain. Staff to implement the recommended measures as far as they are able, whilst ensuring children are kept safe and well cared for. | | | | | | |
| ncreased risk of ransmission due to ncreased pupils / staff vorking in close proximity. | Employees, pupils, contractors and visitors may be exposed to COVID-19. | Social distancing MUST be maintained wherever possible ensuring that staff and pupils are spaced out at all times. Children, young people and staff to only mix in a small, consistent group. Small groups to remain 2m away from each other wherever possible. Pre-school children in early years settings to continue to apply the staff to child ratios and use these to group children. | М | М | М | Early years and primary age children cannot be expected to maintain 2m apart from each other and staff. The hierarchy of measures will be followed to minimise risk: Avoid contact with anyone with symptoms Frequent hand cleaning and good respiratory hygiene practices Regular cleaning of settings (Inc. throughout the school day) Minimising contact and mixing Government guidance relating to implementing protective measures in education and childcare settings is available via: https://www.gov.uk/government/publications/coronaviru s-covid-19-implementing-protective-measures-in-education-and-childcare-settings | All staff | Daily | Daily | L | L | |

| | | Primary school classes split in half, with a maximum of 15 pupils per small group with desks 2m apart and one teacher (and, if needed a teaching assistant). Vulnerable children and children of critical workers to be split into small groups with a maximum of 15 pupils. Existing school attendees (e.g. key workers and vulnerable children) to remain in their existing groups. Secondary school and college classes to be split in half. Where very small classes might result from halving, more than half can be present if the space is available. Desks are spaced as far apart as possible (wherever possible 2m apart). The same teacher(s) and other staff are assigned to the same group and, as far as possible, these stay the same during the day and on subsequent days, recognising for secondary and college settings there will be some subject specialist rotation for staff. | | | | If there are shortages of teachers, then teaching assistants can be allocated to lead a group, working under the direction of a teacher. Pre-school children in early years settings, the staff to child rations within Early Years Foundation Stage (EYFS) continue to apply as set out in guidance available via: https://www.gov.uk/government/publications/early- years-foundation-stage-framework2 Issues with achieving small group working due to lack of classrooms, limited space or insufficient staff to supervise to discuss with the Local Authority or Trust. If necessary, settings have the flexibility to focus first on continuing to provide places for priority groups and then, to support children's early learning, settings should prioritise groups of children as follows: • Early years settings – 3 and 4 year olds followed by younger age groups • Infant schools – nursery (where applicable) and reception • Primary schools – nursery (where applicable), reception and year 1. | | | | | | |

| Considered <i>Step 1 (Clause 3.1)</i> | harmed and how Step 2 (Clause 3.2) | Measures: Step 3 (Clause 3.3) | Likelihood | Severity | Risk Rating | Consider hierarchy of controls i.e. elimination, substitution, engineering controls, signage/warning and/or administrative controls, (PPE as a last resort) | Who (Name) | When (Date) | Complete (Date) | Likelihood | Severity | Risk Rating |
| Due to the risk of transmitting the virus by sending the risk assessment round getting individual people to sign, all staff have emailed L Connolly to certify that they have read the document and will follow the measures. L Connolly has kept these emails as a record. | | | | | | | | | | | | |

| f Harm | High (e.g. death or paralysis, long term serious ill health) | Medium | High | High | | | |

| al Severity of | Medium (an injury requiring further medical assistance or is a RIDDOR incident) | Low | Medium | High | | | |
| Potential | Low (minor injuries requiring first aid) | Low | Low | Medium | | | |
| | | Low (The event is unlikely to happen) | Medium (It is fairly likely it will happen) | High (It is likely to happen) | | | |
| | | Likelihood of Harm Occurring | | | | | |

| Risk Definitions | | | | | |
|------------------|--|--|--|--|--|
| Low | Controls are adequate, no further action required, but ensure controls are monitored and any changes reassessed. | | | | |
| Medium | Consideration should be given as to whether the risks can be reduced using the hierarchy of control measures. Risk reduction measures should be implemented within a defined time periods. Arrangements should be made to ensure that the controls are maintained and monitored for adequacy. | | | | |
| High | Substantial improvements should be made to reduce the level to an acceptable level. Risk reduction measures should be implemented urgently with a defined period. Consider suspending or restricting the activity, or applying interim risks controls. Activities in this category MUST have a written method statement/safe system of work and arrangements MUST be made to ensure that the controls are maintained and monitored for adequacy. | | | | |
